At Daisalux, we design and manufacture emergency luminaires that seamlessly blend with their surrounding architecture. For over 40 years, this distinctive approach, combined with our commitment to technical excellence and safety, has resulted in an established presence in more than 50 countries and partnerships with renowned studios including Foster + Partners, Rogers Stirk Harbour + Partners, Cruz y Ortiz Arquitectos, RDAI Architecture, b720 Fermín Vázquez Arquitectos, and Jean Nouvel.

Wine Architecture

5

Projecting essence through space.

Wine is elusive, a blend of taste and scent that sparks a unique feeling in everyone. Capturing, measuring, or expressing this quality poses a significant challenge for any winery.

In the world of wine, architecture has emerged as a vital means of turning the intangible into something real: a space you can see, touch, and walk through. Beronia and Faustino exemplify how top wineries have embodied their identity through striking architectural projects that connect naturally with their surroundings.

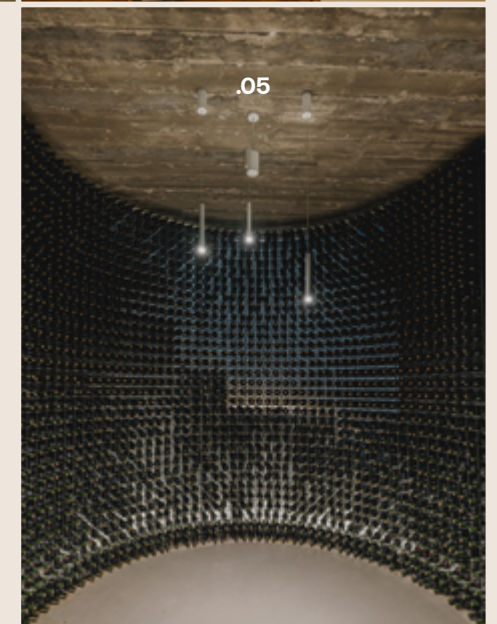

Daisalux contributes to this vision with emergency lighting solutions that blend seamlessly into varied spaces.

Beronia: Enhancing the Landscape

6

The Beronia winery is a natural extension of the terrain, leveraging its contours to blend seamlessly into the environment.

The **ATRIA**⁰⁷, **CLAVO**¹⁴ and **LENS**⁰⁵ luminaires are incorporated into this IDOM project, mirroring the way the building merges with the surrounding landscape.

Faustino: Sharing a Legacy

10

The Faustino winery translates its mission of bringing wine closer to people into a space that warmly welcomes visitors.

SPICA⁰², **LENS**⁰⁵ and **IZAR**⁰¹ luminaires are featured in this Foster + Partners project, subtly enhancing the unique atmosphere within with meticulous attention to detail.

New NAOS^{DX}

15

Redefining functionality.

The new NAOS combines versatility and performance. Its updated design boasts a refined aesthetic with a smooth, soft-textured front that is both pleasing to the touch and visually appealing.

G
Storehouse

The highly adaptable **NAOS⁰⁶** brings a consistent design language to diverse spaces. While primarily an emergency luminaire, it is also available for signage applications.

2025 Exit Signage Catalogue

A range of products crafted to deliver
sophisticated integration across a full
range of spaces.

Emergency exit signage is an integral part of the spatial experience. With its sleek lines that adapt effortlessly to various settings, IKUS combines minimal visual impact with exceptional versatility. **IKUSMET⁰⁹**, a variant of **IKUS⁰⁸**, offers an even more discreet and minimalist design, tailored for those seeking maximum integration.

At Daisalux, we take pride in being the light that guides people through the darkness. **VIR¹⁰** prioritises the sign itself and the light it emits, blending a lightweight, timeless design with high-performance illumination. **VIRSC¹¹** is a luminaire specifically designed for sophisticated spaces where aesthetics are paramount.
